

We wish you a healthy and prosperous 2023!!

Dear colleagues,

The new year has started and will offer many exciting WCRP and CORDEX activities and events. Below we inform and remind about some of those and we will continue to keep you posted on what is coming during the year.

- As you probably know by now The 5th CORDEX conference, **ICRC-CORDEX 2023**, will take place in Trieste, Italy and in Pune, India, as well as online 25-29 September 2023. Please find the preliminary timeline [here](#). The draft programme overview looks like this:

- At the **WCRP Open Science Conference** in Kigali, Rwanda, 23-27 October 2023 CORDEX will arrange and be part of several side events, more info on this will come.
- Deadline extended for new CMIP7 Data Access Task Team!

The demand for and interest in CMIP data is growing rapidly with users coming from an increasingly diverse range of backgrounds beyond the climate research community including climate services, impact modelling, regional and local policy/decision makers and indigenous communities from across the globe. This task team will seek to smooth the path between the conception of experiments and the use of the resulting data. We are looking for a diverse and multidisciplinary team of 8-12 experts representing the range of CMIP-like data providers, data users, and infrastructure providers. We are especially keen to ensure representation from all global regions and across career stages and have therefore extended the call deadline to promote wider participation. Find out more [here](#) where the [call text](#) can be downloaded for further information on the aims and objectives of the Task Team, and the relevant point of contact. Applications should be submitted via this [form](#) by **Monday 23rd January 2023** and if you have any questions please contact cmip-ipo@esa.int.

- The EURO-CORDEX General Assembly 2023 will take place online Monday, 30 January, until Thursday, 2 February.

- The CliC IPO will re-open in 2023 at the University of Massachusetts at Amherst. The Elected director position [has been announced](#) with a deadline March 31.
- At the [EGU 2023](#) there are several 'CORDEX' sessions , among those AS1.11 Clouds, moisture, and precipitation in the Polar Regions: Sources, processes and impacts, CL5.1 Regional Climate Modeling, Including CORDEX and CL2.4 Local scale climate change impacts, processes and extremes. There are of course many others with CORDEX relevance, for instance HS6.11 The Third Pole Environment (TPE) under Global Changes is very relevant for the Third Pole FPS.
- The seventh Convection Permitting Modelling workshop will be held in Bergen, Norway from August 29-31, 2023. You can find details [here](#).

With our best regards and wishes for a peaceful and exciting 2023!!

Irène and Sophia at the CORDEX Office
