

**Make a difference!**

**Be part of the scientific or the organizing committee for the next ICRC-CORDEX conference!**

The preparation of the next ICRC-CORDEX conference has just started and to ensure an effective process we need to set up a scientific committee and an overall organizing committee.

The conference will take place during 2023, tentatively late spring/early summer, and will probably be in a hybrid format, possibly featuring regional hubs, with both in-person and remote/on-line participation.

CORDEX aims to develop and provide detailed, regional climate information necessary for vulnerability, impact and adaptation studies at local and regional levels. CORDEX is working to meet the increasing need for reliable regional climate information communicated in a manner enabling effective impact and adaptation planning.

Some of the topics that will be highlighted at the next International Conference on Regional Climate (ICRC)- CORDEX will be extracted from the CORDEX White Papers and Science Plan, including further development of regional climate as well as impacts and applications.

The conference will also provide a platform for scientists and users from all parts of the globe to meet and advance capacity development, training and knowledge exchange as well as to build new and enhance existing co-operations.

The scientific committee will be tasked with proposing the main theme as well as details of the conference program; sessions, important partners/speakers, side events and more – all in close cooperation with the organizing committee.

The organizing committee will be in charge of the administration such as settling venue(s), handling website and registrations, contact with participants and speakers and close cooperation with the scientific committee.

Hope you want to contribute! Please don't hesitate to contact the International Project Office for CORDEX (IPOC) at [ipoc@cordex.org](mailto:ipoc@cordex.org) and volunteer for the scientific committee and/or the organizing committee.

Send your self-nomination to [ipoc@cordex.org](mailto:ipoc@cordex.org) before 31 December 2021.

IPOC CORDEX Office is hosted by [Swedish Meteorological and Hydrological Institute](#) (SMHI), Folkborgsvägen 17, 601 76 Norrköping, Sweden.
